

ABOUT GURUJAL

GuruJal is an integrated water management initiative, which aims to address the issues of water scarcity, groundwater depletion, flooding and stagnation in the Gurugram District of Haryana. We aim to collaborate with the different stakeholders of the district like corporates, civil society, and research organizations to address the issue using the systems thinking approach.

Our Focus:

The focus is to work on improving the compliances of schemes and policies supporting water conservation, following up on the better enforcement of rules and regulations to mitigate water exploitation, extensive campaigning to sensitize people, come up with better design solutions for the current standing issues and work towards making a better policy framework for water management.

Keeping the gaps and urgency of the issue in mind, a composite water management approach and hence the project GuruJal was envisioned with the objective of “addressing the problems of groundwater depletion, water scarcity, flooding i.e. water mismanagement in Gurugram District of Haryana” by avoiding the duplicity in efforts, enabling better collaboration and having holistic system’s thinking approach.

BE PART OF GURUJAL TEAM

Internship programme

Internship program offer a wide range of opportunities for graduate and post graduate students to gain insight in the technical and administrative programme of GuruJal while enriching their knowledge and experience in the water management field.
