

Position : Program Coordinator
Duty Station : Maharashtra
Districts : Palghar, Pune & Thane

About Sampark Foundation: Impact & Scale

The unsolved Problem

In India, Government led Primary School Education System is suffering with a myriad of issues and the poor learning outcomes for our 144 million children who attend these 740K schools is alarmingly. Third party research and our own base line assessments show that most children even in grade 5 can't add/subtract or construct simple sentence in their local language.

Despite doubling of investment in education by the government over the last decade, the learning outcomes continues to show an alarming negative trend thus an urgent need for a new innovative approach to transform outcomes at scale.

\$1 Innovation

Sampark Foundation was founded by Anupama Nayar and Vineet Nayar (Former Vice Chairman and CEO of HCL Technologies and Author of Employees First Customer Second) with a belief that “frugal innovation” along with relentless execution in partnership with the government can drive large scale change in learning outcomes. This thought led our founders to give up whatever they were doing in 2013 and dedicate their lives to lead this change.

Design thinking with focus on innovation in class room transaction gave birth to **Sampark Smart Shala™** which is a learning outcome focused initiative that uses a sound box with a voice mascot called “Sampark Didi” along with music and songs to teach English using LSRW and whole language approach, Innovatively designed TLMs to teach Math from concrete to abstract , BOT enabled mobile App for teachers that works without internet and multimedia fun workbooks with QR codes for children at less than **\$1 per child per annum**.

The 1 Crore impact

Our journey of learning by working with 84,000 rural schools, 1 crore children in 6 states (Chhattisgarh, Jharkhand, Haryana, Uttar Pradesh, Himachal Pradesh, and Uttarakhand) is just that – a learning journey – because problems at scale can only be solved with patience, perseverance, and lots of passion. Today we train 500,000 teachers each year at block level, and they are our true partners of change and responsible for the encouraging results we have seen through third party assessment.

Position Overview:

To work with the Programs team and support them in planning, implementation and monitoring of related interventions. Tasks includes,

Program Implementation	<ul style="list-style-type: none"> ● Regular school visits to provide on-site support and assess progress ● Conduct demonstration classes as required. ● Undertake classroom observation and provide inputs to the teachers and officials. ● Establish a telephonic review system with teachers and create a learning community.
