

Job Description

Analyst (0-2 yrs PQE), Anthill Ventures

About Anthill Ventures:

Anthill Ventures is a venture capital fund and speed scaling ecosystem. Across mediatech, healthtech, consumer, and urbantech, we invest in high-performing startups and support them post-investment through rapid speed scaling. We do this via a highly developed Speed Scaling Ecosystem of corporates, industry experts, startup mentors, investors, and portfolio startups. Anthill Factory, the speed scaling arm of the business has set up multiple startup scaling programs across our focus sectors. Start-ups in each cohort benefit from these interventions, designed to help them gain rapid market access and access to real customers over a span of a 6-12 month program.

We are looking for an Analyst with smart leadership potential and a drive to make things happen. We offer an equally passionate and driven environment for the right candidate to accelerate their career.

Roles & Responsibilities:

This is a role within the UrbanTech vertical at Anthill and is focused on sourcing and growing startups in the space of smart city technologies, sustainability, proptech, and climatetech.

- Participating end-to-end in the investment process including sourcing startups (Market research, Competitive analysis, Business model analysis), investing in startups (Investment memo, Presentation, Due diligence, Documentation), and scaling support (Market access, Mentorship, Hiring, Marketing, Sales, Product, etc)
- Maintain strong relationships with founders and make thoughtful introductions on their behalf to potential investors, clients, and mentors
- Communicate the unique value proposition of Anthill to startup founders, corporates, mentors, and onboard them onto the portfolio and speed scaling ecosystem respectively
- The role can also involve broader secondary research on different sectors to understand emerging markets and predict the next set of companies to invest in

Required Experience, Qualifications and Skills:

- (0-2) years of experience. Candidates with startup, accelerator/ incubator or VC experience are preferred
- Have expertise or be keen to develop expertise in emerging technologies and business models in Urban Tech, Smart City Technologies, Prop Tech, Sustainability, Climate Tech, etc
- Have excellent written and verbal communication skills and savvy with making presentations, maintaining spreadsheets, etc
- Have experience doing market research, investment research, financial analyses, and have an understanding of business and revenue models

Application Process:

Please share an updated resume detailing your experience and qualifications and a cover letter describing your interest in the role, with the subject “Application for Analyst – Urban Tech” to fazal@anthillventures.com.
