

Come Work With Us
Zonal Program Manager - Madhya Pradesh (Stationed in Khargone or Sagar)
Learning Initiatives For India (LIFI)

Who we are

Learning Initiatives for India was founded looking at the disparity in the access of opportunities of learning among children in our country. With COVID-19, such disparity has only increased. While there were so many children who had access to online learning, it was difficult for children in the rural settings to gain the same access to learning at home. According to NSSO, more than 3 crore children in India are out of school in 2017-2018. This number seems to have increased because of the pandemic.

The opportunity will help to understand the growing problem in India and with the help of their creative minds we aim to bring a change in the society especially to create opportunities of lifelong learning path for the children who do not have access or have dropped out of education purview.

Our Vision

Padhega Har Bachha, Badhega Har Bachha - Access, Learn, Retain, Educate!

Our Mission

We are on mission to

- Create a collective of Youth Teacher Leaders which can support out of school children within their communities.
- Collaborate to create a network of nonprofits and government systems to enable sustainable learning pathways for all children who are out of education purview are at risk of dropping out.

The Role

You will head up the development, expansion, execution and management of the LIFI program, working extensively with all key stakeholders - teachers, schools, students, parents, government and civil society; as well as create, develop a strong city team of dedicated staff. Ability to see the big picture, understand the need and create and adapt the right pathway for the program and supporting environment around it. Reporting to the Chief Program Officer, you will draw on the success of the program to date and provide strategic direction including:

- Annual operating plans lined with the current strategy, funding and values
- Effective day to day running of the program, effective best practices and efficiency
- Building positive working relations with all key stakeholders
- Identifying and responding to the opportunities and further the aims and the reach of the program
- Creating sustainable resource mobilization pathways to stabilize the city programs
